

HMS INDUSTRIAL NETWORKS

A CC-Link slave module, providing a total of 128 I/O points (bit) and 16 words IN/OUT data, with instant connectivity via the uniform Anybus-CompactCom host interface.

Features

- Supports all profiles for a Remote Device (default Anybus Interface profile)
- Total 128 I/O points (bit) and 16 words IN/OUT data (CC-Link version 1)
- No of occupied stations: 1-4
- Selectable baud rates from 156kbit/s to 10 Mbit/s
- Optically isolated CC-Link interface
- Complete CC-Link functionality & Conformance tested
- Support for CC-Link version 2.0 with extended data
- CE pre-compliance, UL & RoHS conformance

Specifications Table

Configuration method	Application interface (switch 1 & 2)
CC-Link version	2.0
Size	52mm x 50mm x 22mm
Baud rate	156kbit/s to 10Mbit/s
Power Supply	3.3 Volt
Temperature Operating	-40 to +70°C
Application interface	Parallel or serial
Order Code	AB6211
